1. Executive Summary

1.1 Project Overview

This Project was made as a computer science project by Jenna Esposito (manager), Therese Racancoj (editor) and Anthony Pastorelli (Chart Maintenance). The purpose of the project is to test the robot and see if it will follow the commands we program into it, which is to follow the blue tape that has been on ground in the shape of a figure eight.

1.2 Purpose and Scope of this Specification

In scope

- **Figer 8 courses**

Out of Scope

- **Other courses**

2. Product/Service Description

2.1 Product Context

This is one of three parts of the Robotics Triathlon

2.2 User Characteristics

- **Team members**

2.3 Assumptions

The class room was assumed to be available when team members needed it

Team members were assumed to have similar schedules

This project was expected to take less time than the first one

2.4 Constraints

- **The tile in class room 208 is uneven**
- **The tape does not always stay down**
- **Teammates have conflicting schedules**
- **Class room 208 is not always available**

Sprint 1 - Endurance Design Document

- The two circles are not the same size

2.5 Dependencies

- This program must be run in class room 208
- Requirements must be finished before the coding process can begin
- Must be placed on the blue tape figure 8

3. Requirements

- Robot must travel along the figure 8 course the robot must travel along the figure 8 course
- Robot must go around the course 5 times the robot must travel along the figure 8 course 5 times
- Robot must say “I am the winner” when the code is run it should say I am the winner
- Flash multicolored lights for 5 seconds at the end the robot must change different colors for 5 seconds at the end
- Robot must start in the center the robot must be placed in the center of the two circles
- Robot must end in the center the robot must stop at the center of the two circles

○ Functional Requirements

Req#	Requirement	Comments	Priority	Date Rvwd	SME Reviewed / Approved
ACCUR ACY_1	Robot must travel along the figure 8 course		Priority 1	11/16	11/17
ACCUR ACY_2	Robot must go around the course 5 times		Priority 1	11/16	11/17
ACCUR ACY_3	Robot must say “I am the winner”		Priority 2	11/16	11/17
ACCUR ACY_4	Flash multicolored lights for 5 seconds at the end		Priority 2	11/16	11/17
ACCUR ACY_5	Robot must start in the center		Priority 1	11/16	11/17
ACCUR ACY_6	Robot must end in the center		Priority 1	11/16	11/17

Sprint 1 - Endurance Design Document

3.1 Security

3.1.1 Protection

NA

3.1.2 Authorization and Authentication

NA

3.2 Portability

- Testing was limited to class room 208
- Recording the video can only be done in class room 208
- Code can be done any where

4. Requirements Confirmation/Stakeholder sign-off

Meeting Date	Attendees (name and role)	Comments
11/17/21	Anthony Pastorelli (Chart Maintenance), Jenna Esposito (manager), Therese Racancoj (editor)	All requirements approved

5. System Design

5.1 Algorithm

Sprint: Accuracy

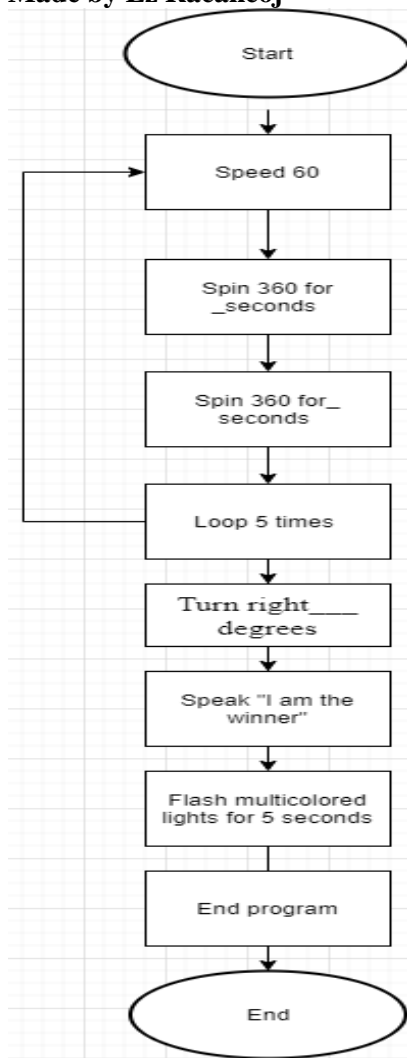

made by: Jenna

1. Speed 60
2. Spin -360 for ____ seconds
3. Spin 360 for ____ seconds
4. Loop 5 times
5. Speak "I am the winner"

6. Flash multicolored lights for 5 seconds
7. End program

5.2 System Flow chart

Made by Ez Racancoj

Sprint 1 - Endurance Design Document

5.3 Software

sphero.edu app

5.4 Hardware

Phone, computer and robot

5.5 Test Plan

Reason for Test Case	Test Date	Expected Output	Observed Output	Staff Name	Pass/Fail
Starting code	11/12	To make a circle	Completed a small circle	Anthony	Pass
Trying to figure out the right code to make a figure 8	11/12	To complete figure 8	Completed figure 8	Anthony	Pass
Fix circle size	11/12	Make circle the right size	Still small	Anthony	Pass
Fix circle size	11/16	Make circle the right size	Finally, the right size	Anthony	Fail
To get the right timing	11/16	Complete the figure 8	All the times seems to be good	Anthony	Pass
To complete the figure 8	11/17	Complete the figure 8	Finally done!	Anthony	Pass

5.6 Task List/Gantt Chart

Made by Anthony Pastorelli

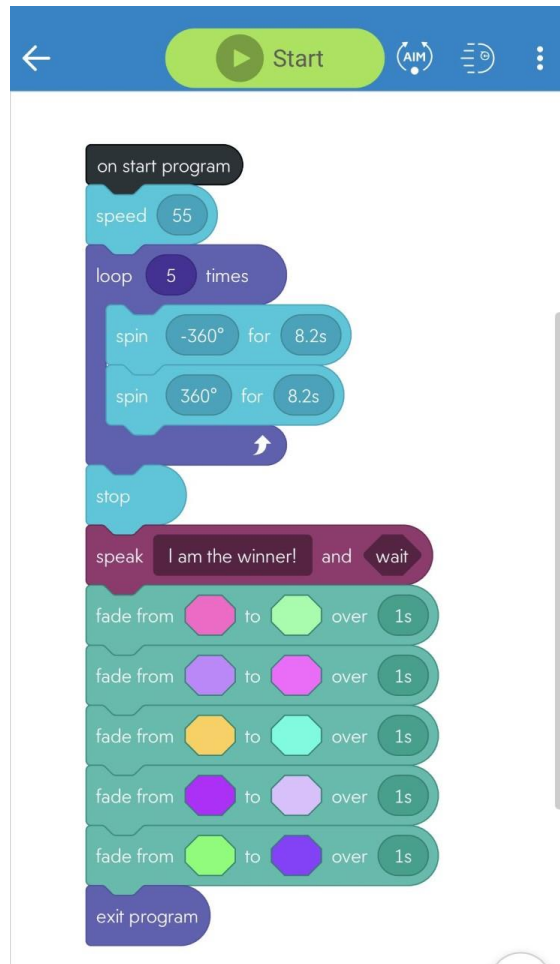

Sprint 1 - Endurance Design Document

Sprint- 2 Accuracy

Select a period to highlight at right. A legend describing the charting follows.

5.7 Block code made by: Jenna

5.8 Staffing Plan

Sprint 1 - Endurance Design Document

Name	Role	Responsibility	Reports To
Jenna Esposito	Manager	Team management, organize staffing plan and deadlines, write algorithm, work with block code, and manage GitHub repository	Team
Ez Racancoj	editor	Editing and finalizing and filling out the doc fill out requirements table, create flowchart	Jenna Esposito
Anthony Pastorelli	Chart Maintenance	Maintain requirements sign-off, test table, and Gantt chart and record robot video	Jenna Esposito
